## Research Assistant and Professional Associate positions, Rudjer Boskovic Institute, Zagreb, Croatia

The Centre for Informatics and Computing at the Rudjer Boskovic Institute (www.irb.hr), Croatia, has two vacancies: **Research Assistant** and **Professional Associate** in the Research Area of Computer Science.

As part of the team, the Research Assistant and Professional Associate will participate in ongoing national and international projects (Croatian Science Foundation, Horizon Europe, Digital Europe) dealing with system design and implementation of scientific codes for parallel and distributed computing architectures applied in numerous research areas and/or participate in the development of new applications based on DLT technology (BlockChain). Depending on personal interests, the candidate can advance his/her research career in one or more research areas: distributed and parallel computing (HPC - High Performance Computing research and applications ), Blockchain technologies, Dew Computing and IoT.

Applicants are expected to hold a Master's degree in the field of technical sciences or in the field of natural sciences (mathematics or physics).

Interested applicants are invited to express their interest at: cir-office@irb.hr.
