

# Primjena 3D skenera u kreiranju BIM modela

ZABLUDA

“

*Laserskim skeniranjem dobivam sve.  
Najmodernija i najmoćnija tehnologija u službi projektanata*

“

Zašto skenirati?

1. korak

Skeniranje

Obrada skena

3. korak

3D model

BIM model

- Podržava niskogradnju, topografske izmjere, as-built modele, BIM modele

**Leica**  
Geosystems

- Kompatibilan s drugim skenerima
- Jednostavna mjerenjenja, 3D vizualizacije i izvoz oblaka točaka i CAD format

- Može se koristiti u kombinaciji s različitim skenerima: Faro, Leica, Trimble i sl.
- Automatska povezanost sa softverima poput Allplana, AutoCADA, BricsCAD.a, Tekle, Revita i dr.

- Rad s oblacima točaka – uklanjanje, pregledavanje, mijenjanje
