

Driving **IDEA** of this **ERASMUS+** project:

Co-funded by
the European Union

International Education Community in Glass Construction

- harvest existing **high quality educational materials** on **GLASS DESIGN & ENGINEERING**,
- **digitalise and share** them as **Open Educational Resources (OER)** on an **open access** online platform – **Open GLASSroom**.

Project overview:

- Funding: **Erasmus+** (400.000 €)
- Duration: 11/2022 – 10/2025

• GOALS:

- build up an **OER platform**,
- create a base for a common future oriented **glass curriculum**,
- develop new (OER based) **teaching / learning formats** at partner universities forming a cross-disciplinary **community** of glass experts.

Open GLASSroom platform – a virtual go-to place for up-to-date OER content on glass design & engineering serving/being maintained by a strong knowledge based community of glass experts:

- **A repository for cross disciplinary materials** on glass design & engineering sourced from a diverse spectrum of contributors.
- **A central place of virtual exchange** between the partner organisations and project stakeholders.
